More

All of the ornamental products we offer are hand made by a credentialed European master. Many ornamentals from other sources seem beautiful but upon closer examination you can see they are unnecessarily soldered and improperly made. Not only do we possess the knowledge to make these pieces of art correctly to last forever, they are all made in the style and tradition of the world's most beautiful castles and cathedrals. A large amount of our products are indeed a permanent addition to a great deal of these important architectural treasures.

We are very proud to now be able to offer these works of art to our discriminating American clientele.

Ornaments. copperexclusive.com

Enduring beauty. Made for you.

Our level of craftsmanship, style and aesthetic are difficult to come about, but what sets us apart even further is our selection of unique items. The Swiss elbows and adornments we carry, for example are the epitome of both form and function and an architectural element rarely

seen in the new world. We have built some of the most intricate and detailed column toppers, and our designer leaderheads rival any ornate finial as the ultimate showstopper. With our generous assortment of beautiful finials and weathervanes, trims and embellishments, European chic dormers, louvres, vents, and chimney caps, we have all your ornament needs covered.

Though we have a large array of lovely, pre-designed products from which to choose, we excel at both creations and restorations. We are board certified in restoration techniques and know how to make these very important projects last hundreds of years more! We love working on custom designs in both modern and traditional styles and can certainly help you with even your most difficult projects.

By choosing our products, you can rest assured that you are getting the absolute best in design and craftsmanship the world has to offer.
